Artists and designers reinterpret the flame of a perfumed candle

Art, music, spirituality, relaxation and fire. All these combine in **Art & Candle** by [Olivier Rohrbach](#), founder of the Swiss perfumed-candle brand [Calming Park](#), renowned for the high concentration of scented essences in its candles.

Designer-artist [Rohrbach](#) cultivates the cult of relaxation and has also produced albums of lounge music. He invited seven gurus from glamorous worlds like fashion, music and visual arts to design and customise perfumed candles.

Red-hot names, like that of stylist [Bruno Pieters](#) who chose black pepper as the top note for his all-black candle. Or the gothic allure of the candle with tuberose and musk notes, inspired by [Arielle Dombasle](#)'s album *Glamour à Mort*.

Burning with the sacred fire of art, they form an exhibition at [10 Corso Como](#), Milan, 20-27 June. The stylish preview for "**Art & Candle - Candles are the new flowers**" is held tomorrow evening from 6pm to 9pm.
